ABOUT NAUTEL

More than 36 years of DAB history in Rennes....

- **1987: Start of the DAB standard development within the EUREKA 141 European Project: CCETT (FT Orange) and IRT (Germany)**
- **Early 1990s: Jean Luc Pavy, Gerard Faria and Alain Untersee create ITIS company with unique technical expertise in digital COFDM modulation (originally CCETT licenses) as well as multiplexing and audio encoding**
- **1996: Harris (GatesAir today) buys ITIS**
- **2005: ITIS stopped in Europe, but 3 spin offs:**
 - **2003: Creation of Teamcast by Jean Luc Pavy et Gerard Faria**
 - **2005: Creation of DIGIDIA by Pascal Olivier, Manuel Billot, Damien Bernard and Christophe Percier**
 - **2005: Creation of INNES by Frank Dupin**

DIGIDIA History

2015

10 years of DIGIDIA

Construction of Company Building

2021

Nautel takes over DIGIDIA

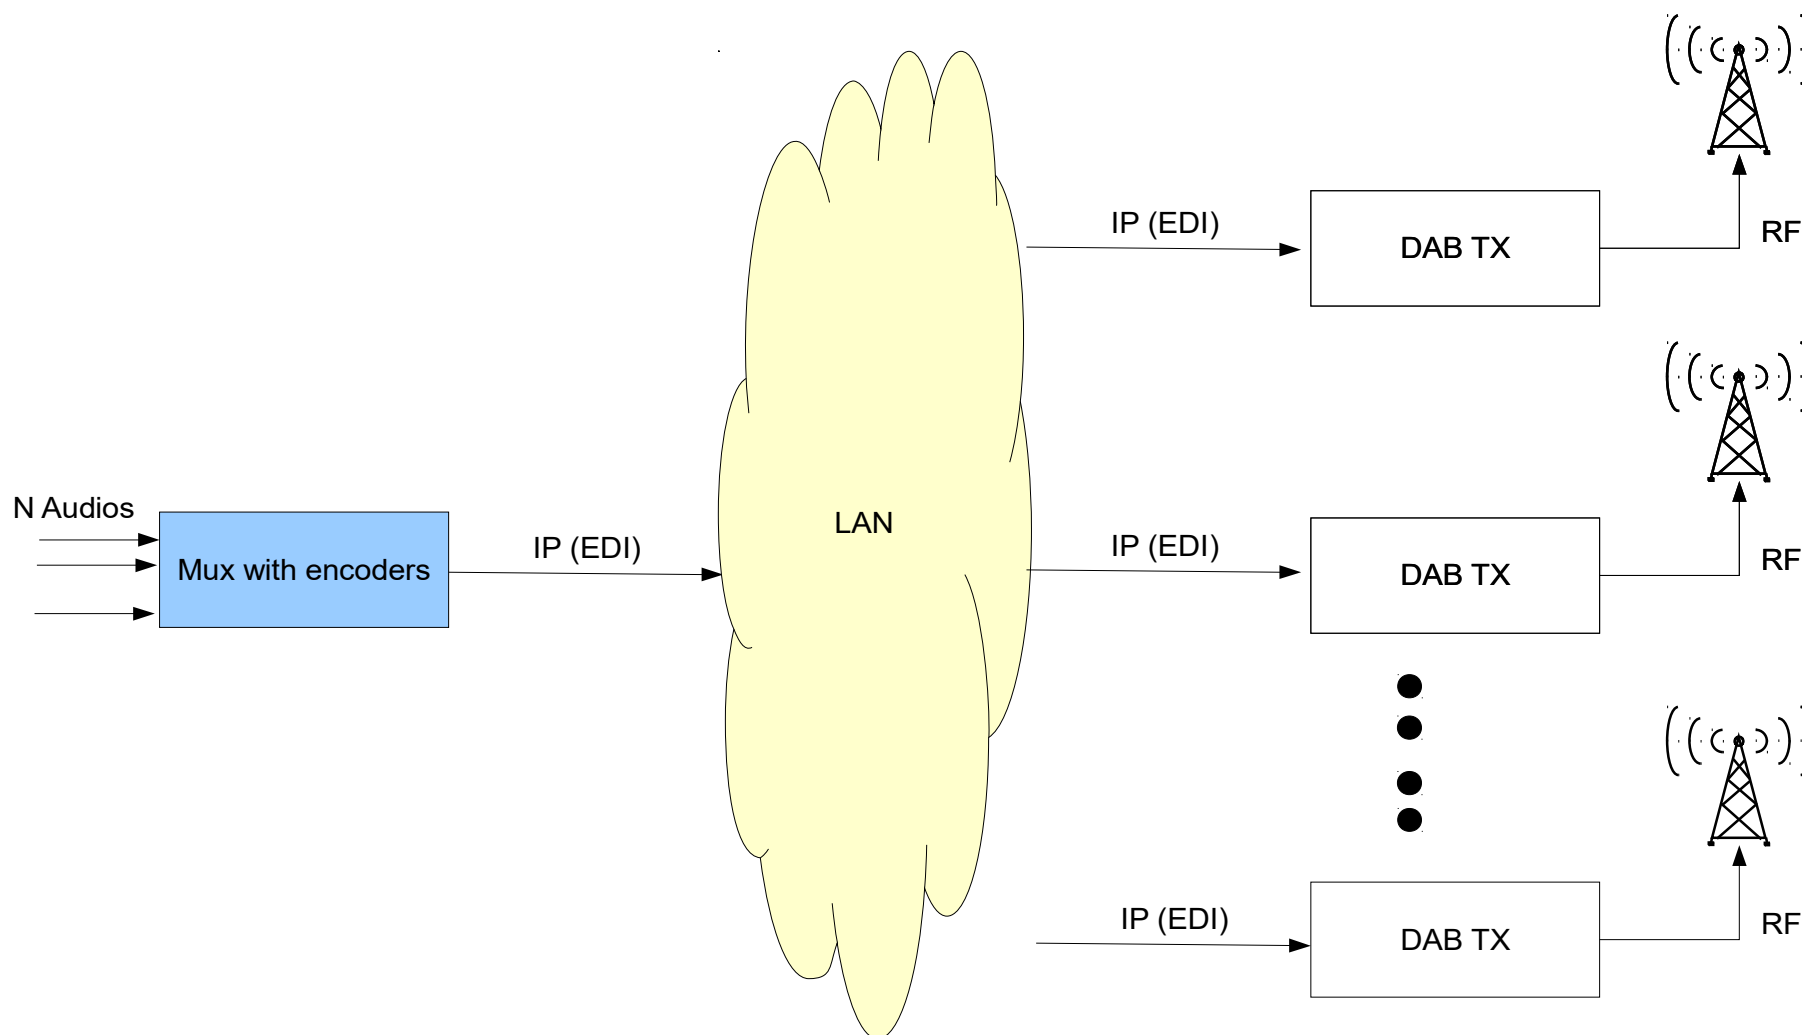

Digidia 100% subsidiary of NAUTEL

2022

DIGIDIA brand as part of
KENTA Technologies

KENTA and DIGIDIA merge to KENTA
Technologies, owned 100% by
Nautel

/// DAB System Overview

Key Products

**DAB/DAB+
/DMB**

Tunnel Break-in System

- **DAB-BI 2.0:** DAB/DAB+/DMB Tunnel Break-in System

Head-end Platform;
Decoder/Digital Exciter

- **SYNCFM:** Synchronous FM Decoder & FM Digital Exciter

- **SPANFM:** Synchronous FM Head-end

“Very Compact &
Professional Products”

**DRM30
/DRM+**

Content Server;
Modulator/Exciter; Professional
Receiver

- **ALTO:** DRM/DRM+ Content Server
- **SOPRANO:** DRM/DRM+ Modulator/Exciter

“Control & Monitoring
By WEB & SNMP”

**DAB/DAB+
/DMB**

Encoding & Multiplexing
Platform; IP Gateway;
Professional Receiver

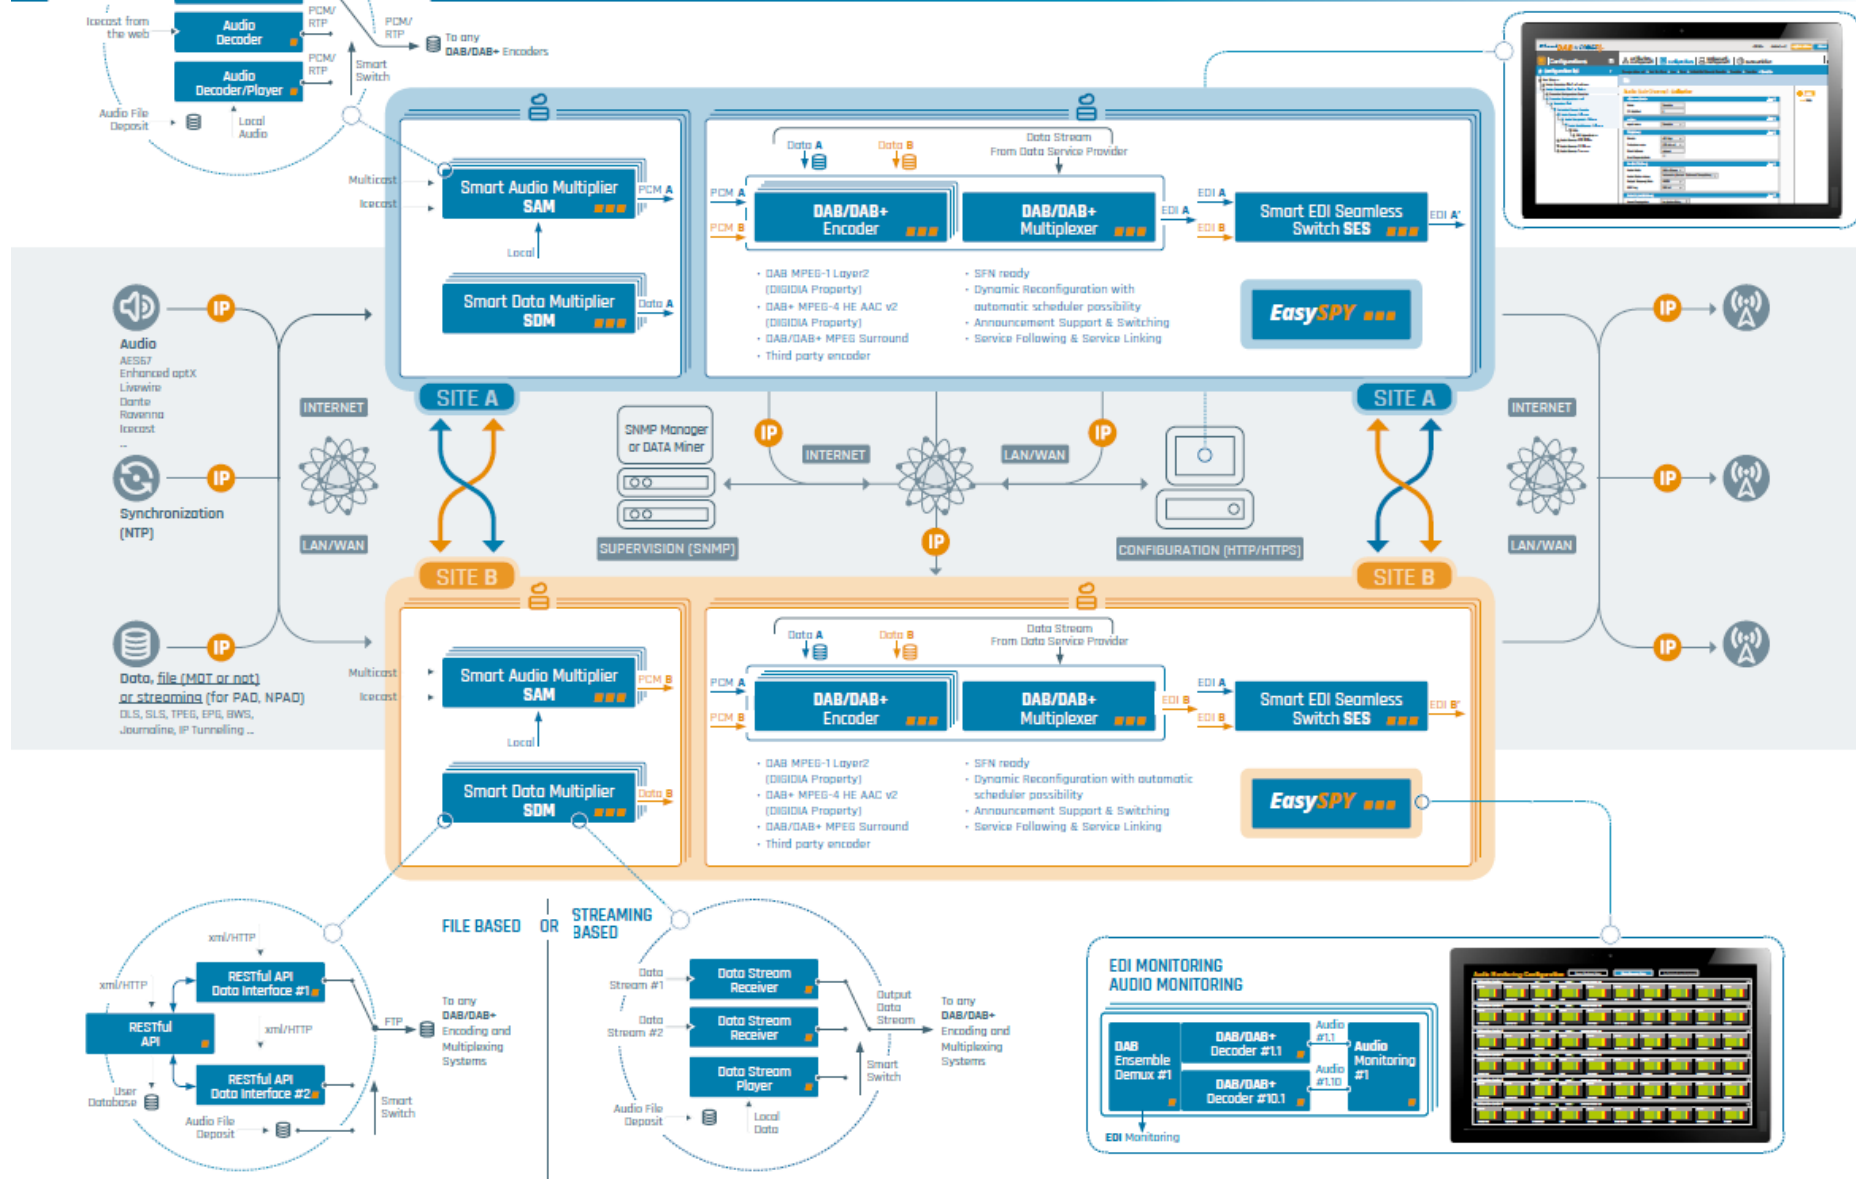

- **FLEXIDAB:** DAB/DAB+/DMB Head-end System

- **EASYSKY:** DAB/DAB+/DMB RF/EDI/ETI Monitoring Receiver

Research for R&D

Key Projects

/// First and Second Generation of DAB Break-in System supplied in Hong-Kong

5 x complete systems integrated in a 19" Rack have been delivered in 2012/2013 to PCCW

Each 19" Rack includes:

- RF Receiver & Synchronization Unit,
- DAB-BI breaking unit,
- DAB Modulation Unit
- 25W Amplification Unit

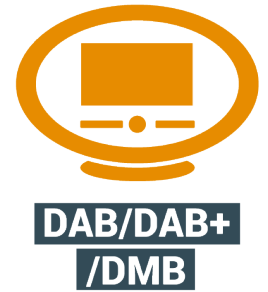

2 x DAB-BI 2.0 have been supplied for an extension in Hong-Kong to SEE Telecom in 2015

/// DAB+ Complete Head-end system for the national multiplex in Hungary

Complete system integrated in a 19" Rack has been delivered in 2011

The 19" Rack includes:

- 1+1 Redundant DAB+ Head-end system (FlexiDAB)
- Ensemble Multiplexer with 10 DAB+ Audio Encoders & PAD inserters, EPG & TPEG NPAD data
- SFN operation

System Upgrade and supply of additional products for Magyar Radio in 2013

This Upgrade includes:

- 1+1 Redundant DAB+ Head-end system (FlexiCOD)
- Service Multiplexer with 8 DAB+ Audio Encoders with PAD inserters

Key Projects

Complete system delivered
for existing MW transmitters
upgrade

This system includes:

- 23 ALTO DRM Content Servers
- 19 SOPRANO DRM Modulators

/// Complete Systems delivered for the National DRM Roll-out in India

Complete system delivered
with HARRIS 25kW MW
Transmitters

This system includes:

- 6 DRM systems in 1+1
- 12 ALTO DRM Content Servers
- 12 SOPRANO DRM Modulators

**DRM30
/DRM+**

Complete system delivered with
NAUTEL 50/100/200/300kW MW
Transmitters

This system includes:

- 26 DRM systems in 1+1
- 52 ALTO DRM Content Servers
- 52 SOPRANO DRM Modulators
